True Value Creator,  
**TECHCROSS**

TEHCROSS is a comprehensive environmental company that prioritizes the value of customers and the environment and leads the domestic and overseas environment industry.

Based on cutting-edge technologies and accumulated know-how, we offer our customers the best solutions and create a sustainable environment through various projects to help circulation and preservation of resources, such as onshore and offshore water treatment, waste treatment and energy recovery, air pollution reduction, and renewable energies.

# Company Overview :

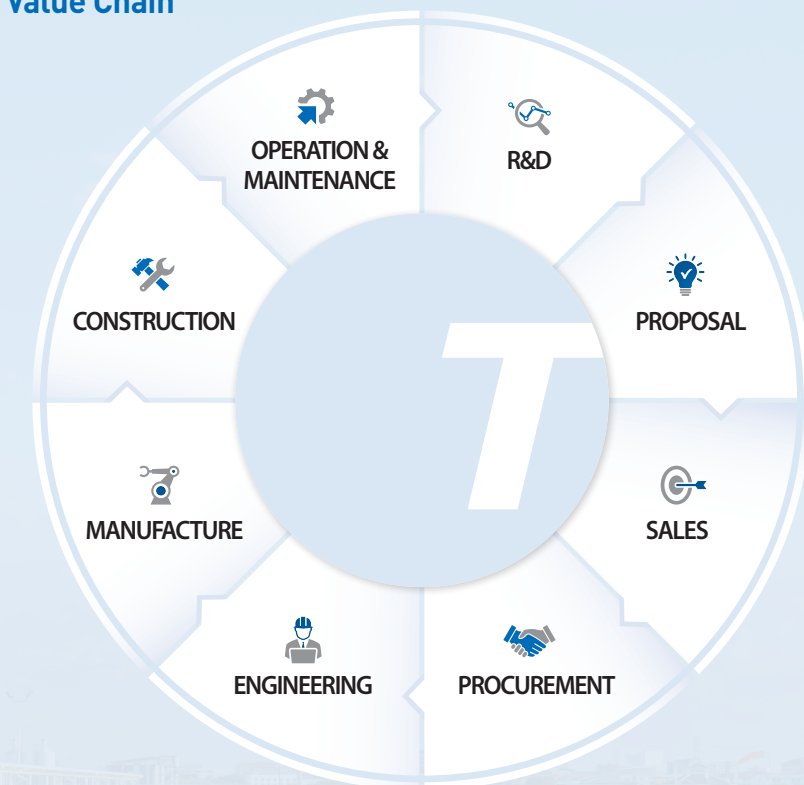

## Comprehensive Environmental Company

TECHCROSS, a true value creator, offers an entire solution covering all value chains of the environmental industry, including onshore and offshore water treatment, waste treatment and energy recovery, air pollution reduction, and renewable energies.

### Company Introduction

### TECHCROSS Value Chain

### Affiliates

<b>BUBANG</b>	<b>BUBANG</b> RETAIL	<b>CUCHEN</b> <sup>+</sup>	<b>KSF</b> Korea Ship Finance	<b>J1 Investment</b>	<b>ECK</b> www.eck.or.kr 엑스씨텍(주)	<b>BIZ TECH</b>
Established in 1934 Subsidiary management, investment, and M&A	Established in 1997 Operation of large-scale discount stores	Established in 1976 Home appliances production & sales	Established in 2003 Management of vessel financing	Established in 2004 Management consulting	Established in 2004 Integrated facilities management and worker dispatch business	Established in 2007 S/W development, supply, and consulting

# SAVE OPEX

## “ Customer Value Maximization ”

Based on our expertise in the environmental industry and differentiated, customized solutions, we save operational costs and bring customer value to the fullest.

- **Reduce life cycle costs through customized design and a pool of competitive vendors**

We reduce life cycle costs by customizing design based on accumulated big data and securing competitive and proven vendors.

- **Reduce construction period through organized schedule management and efficient construction management**

We reduce the total construction period by establishing an organized construction schedule, efficient project management system, and effective commissioning & start-up plan.

- **Optimize operational costs through efficient resource management**

Our accumulated operational know-how and efficient management enables operational cost optimization.

- **Reduce maintenance costs through advanced periodic & preventive maintenance technique**

With timely parts replacement and repair based on Smart O&M, we extend the life span of equipment and reduce maintenance costs.

# SAVE EARTH

## “ For Environmentally Sustainable Future ”

The rapid increase in population and ever-growing society and economy worldwide has caused various environmental problems, including climate change, frequently occurring natural disasters, environmental destruction, and reduced variety of species. In particular, global warming caused by climate change and wastes generated from using resources are the key challenges that we must resolve. TEHCROSS WATER & ENERGY builds and develops business models for recycling and renewable energies, while TEHCROSS ENVIRONMENTAL SERVICES contributes to cutting carbon emissions through reduction, reuse, and recycling of resources. Also, we play a key role in creating a sustainable future through commercializing environment-friendly designs and constructions. In addition to these efforts, we also dedicate ourselves to improving the air and water environment, and solving water shortage issues with cutting-edge technologies.

Paju Treated Sewage Effluent Reuse Plant

Bucheon Sewage Treatment Plant

Yeonggwang Waste-to-Energy Facility

# Vision and History :

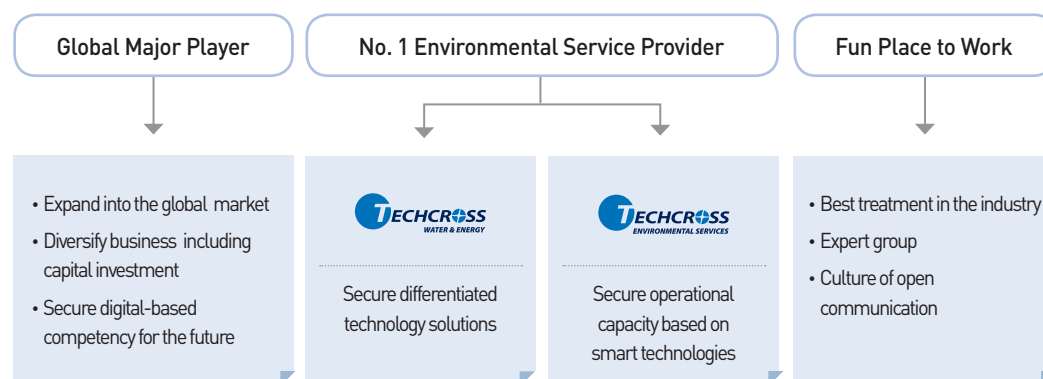

## Mission

Contribute to humanity and environment through convergence of technology and human

## Vision 2030

Global Top-10 environmental company that makes everyone happy

## Core Values

Building trust by having employees fulfill their due roles, and having the organization as a whole take full responsibility for business and customer satisfaction

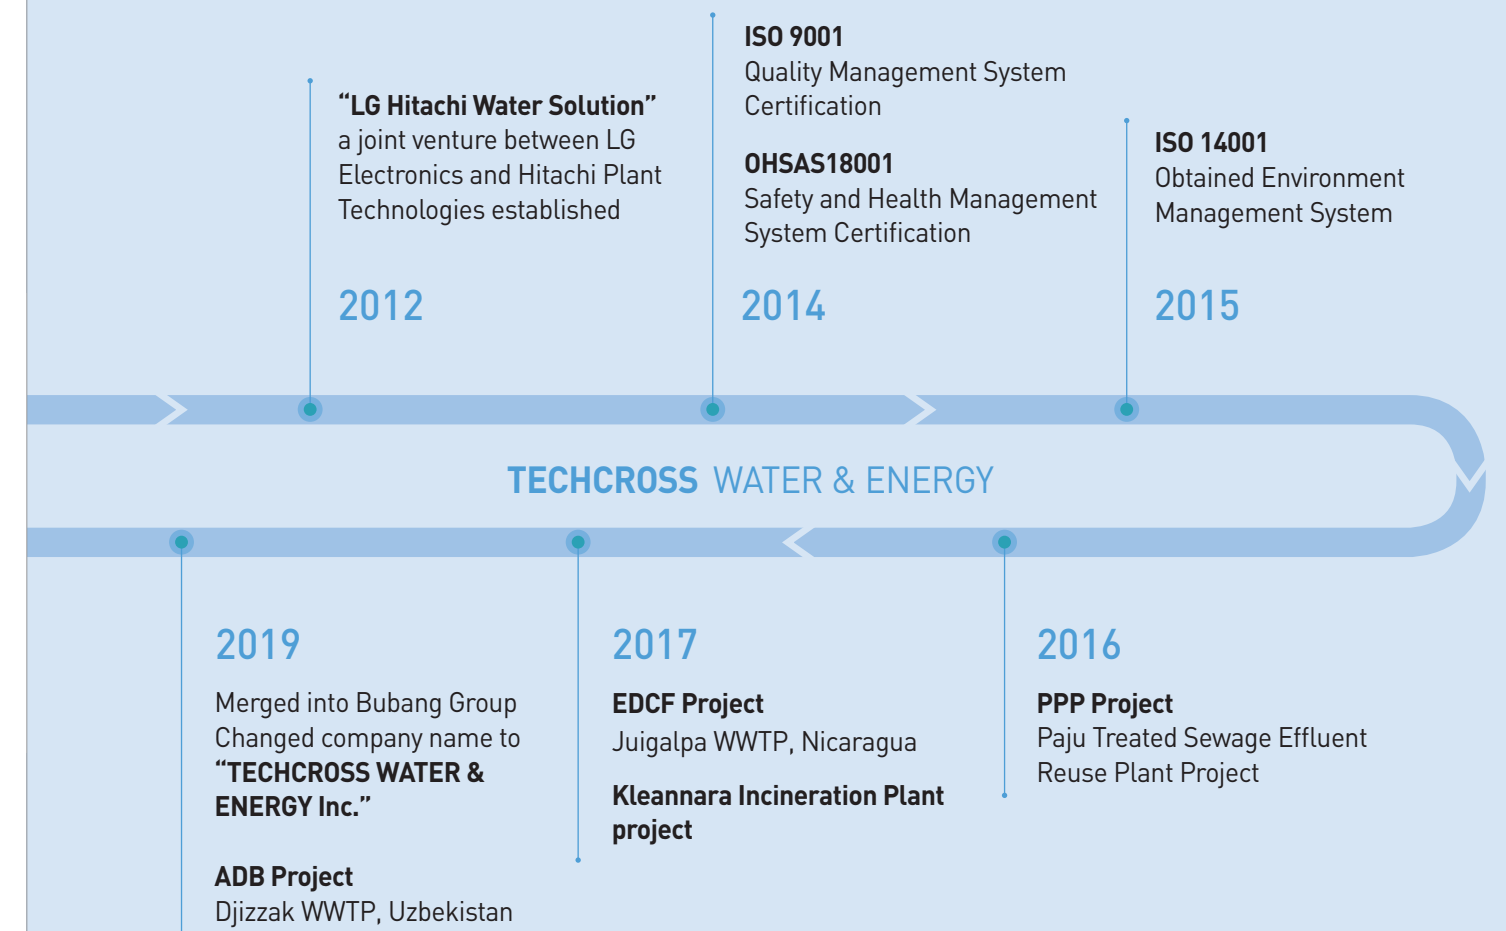

Building the new business in rise above the challenge and complacency of members

Taking maximization of the expertise from each member to the Company as a one

Sharing the happiness from self-motivated work environment

## History

# BUSINESS AREA

## Business Area

### Water supply

- Industrial Water Supply
- Pure & Ultrapure Water Production
- Desalination Production
- Water Pipe Network

### Sewage and Wastewater Treatment

- Sewage Treatment
- Wastewater Treatment
- Water Reclamation
- Sewer Network

### Waste to Energy

- Waste Incineration & Power Generation
- Landfill Development & Restoration
- Organic Waste Resources Treatment
- Soil Purification

### Renewable Energy

- Photovoltaic (PV)
- Energy Storage System (ESS)
- Fuel Cell

### Air Pollution Reduction

- Cyclone
- Scrubber
- Activated Carbon Absorption Tower
- Bag Filter & Bio Filter
- RTO & RCO & CTO

# Business Performance :

## Water supply

Industrial Water Supply

Desalination Production

Pure & Ultrapure Water Production

Water Pipe Network

We supply the best quality water to customers through quality production of pure and ultrapure water required for the manufacturing of displays, electronics, etc. With the construction experience for a project with the largest scale in Korea in the industrial water sector, we have performed various projects.

## 02 SK Siltron Gumi #3 DI System Extension Project

Client	SK Siltron
Location	Gumi, Korea
Completion	2011
Capacity	Pure and ultrapure water: 208 m³/hr

## 03 Coca Cola Korea Yeosu Drinking Water Facility Extension Project

Client	Coca Cola Korea
Location	Yeosu, Korea
Completion	2012
Capacity	Pure and ultrapure water: 260 m³/hr

01

## 01 LG Display P9 Environment Facility Project

Client	LG Display
Location	Paju, Korea
Completion	2019
Capacity	Ultrapure water production facility: 4,100 m³/hr Industrial Water Supply Pipeline: 57.85 km

Sewage / Wastewater

Sewage Treatment

Wastewater Treatment

Water Reclamation

Sewer Network

We perform sewage and wastewater treatment and reuse wastewater from treatment facilities as industrial water at a low cost.  
Reusing sewage and wastewater can help improving competency in the industry and maximizing the revitalization effect for local economies.

02 Paju Treated Sewage Effluent Reuse Plant Project (PPP)

Client	Paju
Location	Paju, Korea
Completion	2018
Capacity	Reuse water supply: 41,200 m³/day

03 LG Chemical Yeosu Utility Center WT & WWT Plant Project

Client	LG Chemical
Location	Yeosu, Korea
Completion	2019
Capacity	Wastewater treatment plant: 1,080 m³/day Industrial water supply facility: 34,560 m³/day

01 LG Display P9 Environment Facility Project

Client	LG Display
Location	Paju, Korea
Completion	2019
Capacity	Wastewater treatment plant: 27,100 m³/day Reuse water supply: 14,200 m³/day

Waste to Energy

Waste Incineration and Power Generation

Landfill Development and Restoration

Organic Waste Resources Treatment

Soil Purification

01 Kleannara Cheongju Incineration Plant Project

With this largest fluidized bed facility construction project in Korea, we introduced the most optimal facility to treat sludge generated from the wastewater treatment facility in the factory at the site. The steam generated in the course of incineration of sludge and SRF maximizes the production efficiency and the operational cost-saving effect.

Client	Klean Nara	Completion	2019
Location	Cheongju, Korea	Capacity	Fluidized bed incinerator: 400 ton/day / Stream supply: 25 ton/hr

02 Yeonggwang Waste-to-Energy Facility Project

This project uses waste as resource to produce and supply power. We supply approx. 9.9 MW electricity through SRF production, incineration, and power generation.

Client	Yeonggwang SRF	Completion	August 2022 (Expected)
Location	Yeonggwang, Korea	Capacity	SRF manufacturing facility: 250 ton/day / Stoker incinerator: 300 ton/day Power generation facility: 9.8 MW

Air Pollution Reduction

Cyclone

Scrubber

Activated Carbon Absorption Tower

Bag-Filter and Bio-filter

RTO & RCO & CTO

01 LG Electronics Tennessee Clarksville Environment Facility Project

We design and construct the facilities to reduce air pollutant emissions from pollution sources.

Client	LG Electronics	Completion	2019
Location	Tennessee, U.S.	Capacity	C-RTO: 4,200 m³/min / Scrubber: 300 m³/min

02 LG Electronics Gumi Solar Environment Facility Project

Client	LG Electronics	Capacity	Wet Scrubber: 500 m³/min × 4 set A/C Tower: 350 m³/min × 1 set FAN: 450 m³/min × 5 set
Location	Gumi, Korea		
Completion	2015		

Renewable Energy

Photovoltaic (PV)

Energy Storage System (ESS)

Fuel Cell

01 Jungnang WWT Plant ESS Installation Project

This energy efficiency improvement project, which stores the unused power during nighttime amounting to daily use of 1,600 households for the time slots with high demand for electricity, has a strength that it can improve power use efficiency without the need to extend power generation facilities.

Client	Seoul Jungnang Water Recycling Center	Completion	2017
Location	Seoul, Korea	Capacity	PCS: 3MW Battery: 19.9 MWh

02 LG Electronics Gumi A1 Factory ESS Facility Installation Project

Client	LG Electronics	Capacity	PCS: 3 MW
Location	Gumi, Korea		Battery: 13.3 MWh
Completion	2017		

Client	Seoul Nanji Water Recycling Center	Completion	2018
Location	Seoul, Korea	Capacity	PCS: 1 MW Battery: 6.7 MWh

International Project

01 Nicaragua Juigalpa Wastewater Treatment Plant Project

Funded by EDCF (KEXIM Bank), this project builds a WWTP in Juigalpa, a central inland town of Nicaragua, and is expected to improve the health and life environment of 70,000 citizens in the region. The client of this project is ENACAL, a state-owned enterprise in Nicaragua.

Classification	Sewage Treatment Plant	Capacity	Sewage Treatment Plant 11,000m³/day
Client	ENACAL		Sewer Pipeline 113km
Location	Juigalpa, Nicaragua		32 Pumps
Construction Period	January 2018 -		9,457 Drainage Facilities

International Project

02 Uzbekistan Djizzak Sanitation System Development Project

This is a project where the Uzbekistan government builds a WWTP of 30,000 m³/day to procure infrastructure in Djizzak, a prospective center of the region under development. The project is funded by Asian Development Bank (ADB), and the Uzbekistan government expects that the sewage and wastewater system to be connected to the region will be improved and that 85,000 residents and more than 350 businesses in the region will enjoy direct or indirect benefits.

Classification

1 Pump

03 Nicaragua Bluefields Wastewater Treatment Plant Project

In this project, funded by a cooperative loan of Central American Bank for Economic Integration (CABEI) and Economic Development Cooperation Fund (EDCF), we perform the design and construction of a WWTP, comprising of a wastewater treatment facility, sewer pipeline, pumps and drainages, in an eastern marine city called Bluefields. It is expected to improve the health, hygiene, and living environment of 50,000 citizens in the region in Nicaragua. The client is ENACAL, a state-owned enterprise in Nicaragua.

WATER & ENERGY  
ENVIRONMENTAL SERVICES

- R&D Center
  - O&M Performance and Achievements
- : TEHCROSS ENVIRONMENTAL SERVICES

## R&D Center :

### Institute of Environmental Technology

We aim to gain differentiated technical competency by continuously seeking technology development and by formulating technology strategies to cope with changes in the future environmental industry.

### Major Research Area

#### 01 | Smart O&M

- Efficient O&M through digitalizing operational and asset-related information of environment facilities
- Intelligent O&M using state-of-the-art data management technologies such as AI, big data, etc.

#### 02 | Water-Energy Nexus

- Biogas upgrading technology for organic waste digestion
- Biological Electrochemical Methanation technology that uses microorganism to convert CO<sub>2</sub> to methane
- Desalination technology powered by photovoltaic panels for off-grid areas
- Core technologies for construction and operation of large-scale water electrolysis plant for hydrogen production

#### 03 | Water Reuse

- High-efficiency, low-cost membrane separation technology for sewage and wastewater reuse
- Concentrate treatment technology for water reuse

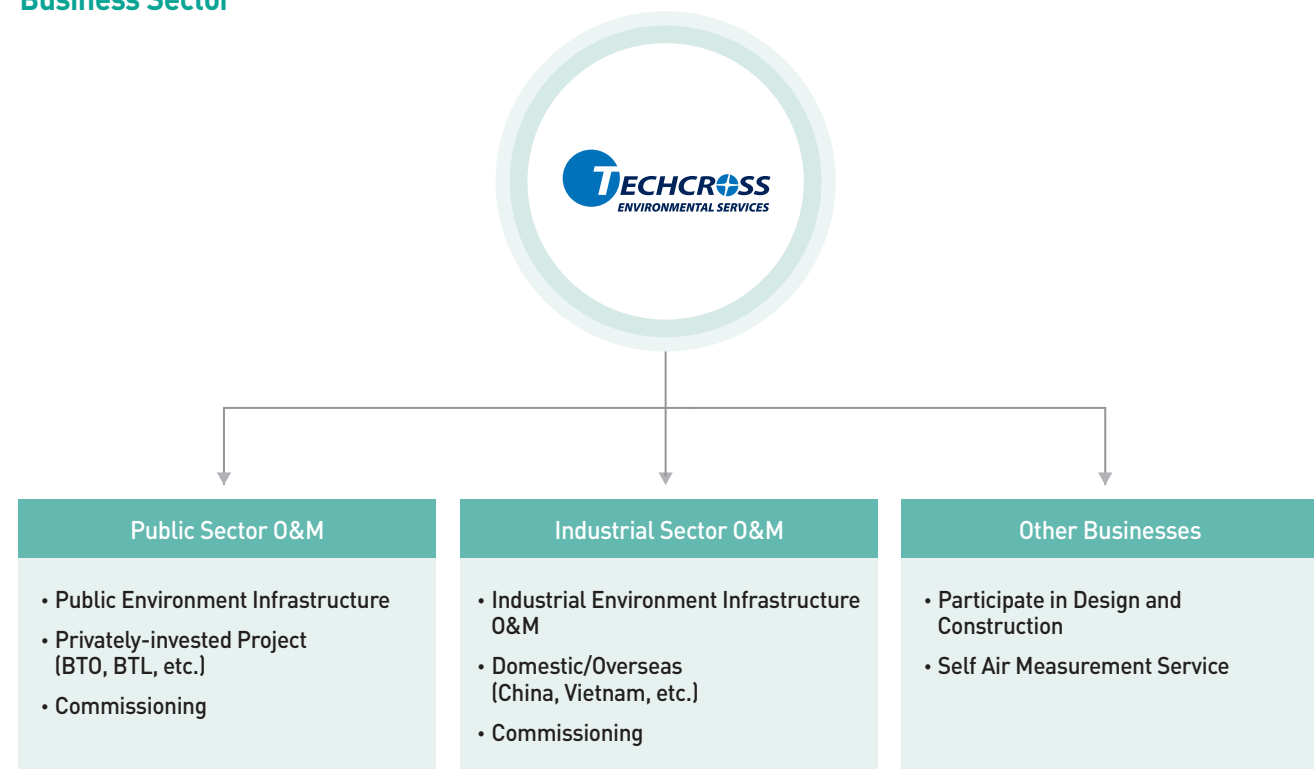

# O&M Performance and Achievements :

TECHCROSS ENVIRONMENTAL SERVICES, Reliable Environmental Operations Management Partner

## O&M Business

TECHCROSS ENVIRONMENTAL SERVICES operates and manages water treatment projects, such as public sewage and wastewater, industrial wastewater, ultrapure water and water reuse, waste treatment and energy recovery projects, air pollution reduction projects, and ESS and other renewable energy projects in and out of Korea. Starting with the environment management business in 1999, we operate Bucheon Northern Wastewater Treatment Plant, the largest private facility in Korea, and has built ample know-how and technologies in water treatment by operating around 50 public facilities as well as private facilities covering electronics, pharmacy and other various sectors. Our reliable solution improves the stability, efficiency and economy of operations and management, leading to the best customer satisfaction.

## Business Sector
